

you own this

We understand the rare collectibles market like nobody else.

Over the past 20 years we've built an international reputation for offering the finest historic autographs, memorabilia, coins and postage stamps.

More than **2,000 clients** around the world have entrusted us with over **£100 million**. And now we're looking to the future. We're embarking on a groundbreaking project that bridges the gap between traditional and digital collecting.

It's called Collector Labs

We don't see this as simply the launch of a new product. **It's an entirely new way of collecting.**

It will revolutionise the NFT and collectibles space with the combination of tangible assets, fractional ownership and blockchain technology.

And it gives collectors at every level the opportunity to own **an investment-grade piece of history.**

Be the first to join this exciting new venture

This is your chance to invest in a dynamic new market on the ground floor.

If you have a passion for history, we'll help you build a superb portfolio of rare investment grade collectibles.

We're industry leaders when it comes to achieving results for our clients. You can join them today.

Collector Labs offers you

- Fractional shares in genuine historic items
- Rendered as highly collectible digital NFTs
- Backed up with unique blockchain authenticity

Unlike 'crypto art' NFTs, our collectibles are firmly rooted in the real world.

We're minting **actual shares** in tangible items, from space-flown objects to medieval manuscripts, rare stamps or pop culture memorabilia.

Every item we offer is carefully chosen for its rich history and **future investment potential.**

These fractional shares are represented by NFTs, with each piece recreated in fine 3D detail.

Each individual NFT comes with its own historical information, provenance, certification, a guarantee of authenticity and reward schemes for holders.

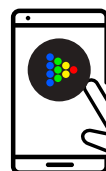

Your ownership is secured using powerful 21st century **blockchain technology.**

And the result is a **unique rare collectible** that's secure, easy and enjoyable for you to trade online.
