Professor Labs 3 easy steps to NFTs

- 1 Create a cryptocurrency wallet
- 2 Add the Polygon network and USDC
- 3 Connect to Opensea to View and buy NFTs

Create a cryptocurrency wallet

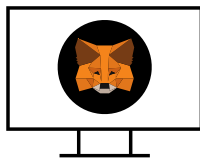

What is Metamask?

Metamask is a software cryptocurrency wallet used to interact with the Ethereum blockchain. It allows users to access their Ethereum wallet through a browser extension or mobile app, which can then be used to interact with decentralized applications.

On Mobile

Download Metamask from the App Store or Google Play

On Desktop

Head to metamask.io and follow the instructions

Follow the instructions to the letter in both cases, once you have done this you will be able to proceed to the next step, 'adding Polygon & USDC' to Metamask wallet. Pay special attention to the security warnings about your private key phrase.

Once you have completed the steps outlined by Metamask you will have either the Metamask extension on your browser or the Metamask wallet in your mobile device.

Vital Security It's vital that you note these words down and store them securely, preferably offline. They are the keys to your wallet, and you must never share them with anyone. **No entity would ever ask for your key words so if they do you can be sure it's a scam.**

Adding the Polygon Network and USDC

The Polygon Blockchain provides our users with a fast and cost effective way of transacting. We use USD pegged to USDC stablecoins to provide a frictionless and borderless payment and transaction method. Using stablecoins for our NFTs protects you from crypto market volatility.

Every PiNFT will be priced at \$100 USDC

On Mobile

Enter your Metamask Wallet and click the top part where it says "Ethereum Main Network"

Click "Add a Network", select "Polygon Mainnet".
You have now added the Polygon blockchain to your wallet.

Next, we need to add the USDC Currency to your wallet.

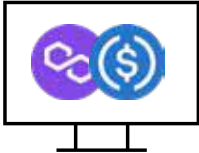

At the top of your wallet page underneath "Wallet" **check it says "Polygon" underneath**, if not click on "Wallet" at the top and select "Polygon"

Click the menu bar top left in Metamask again and select "Wallet"

Next, select "Import Tokens"

In the Search Field type "USDC", click on the 1st token in the list with the blue and white logo. Then click "Import"

You have now added the USDC currency to your Wallet.

On Desktop

Install the Metamask extension, head here <https://metamask.io/download/> and install.

Next enter <https://polygonscan.com/> in your browser, navigate to the bottom of the page and click "Add Polygon Network" (at the bottom of the page next to the Metamask logo).

Click approve & switch network.

You have now added the Polygon blockchain to your wallet

Next, click on your metamask wallet extension (a small shortcut program that lives in the top right your browser) or use the main page. and enter your password if required.

Next, we need to add the USDC Currency to your wallet.

At the top of your wallet check it says "Polygon mainnet", if not click on that part at the top and select "Polygon mainnet"

Next, select "Import Tokens" in blue, near the bottom.

In the 1st field (Token Contract Address) enter the contract number for USDC, this is

[0x2791Bca1f2de4661ED88A30C99A7a9449Aa84174](#)

Click on the remaining empty fields and they will auto fill.

Next, click "Add Custom Token"

Then click "Import Token"

You have now added the USDC currency to your Wallet.

***TO ADD FUNDS**

For desktop Metamask Click "Buy" you can then use Moonpay to purchase with a card. For Metamask Mobile click "Buy". You can then Use Bank Transfer, Apple Pay, or Card to Purchase USDC on Metamask, there is a small fee so make sure you purchase enough to buy all the NFTS you require

Connect to OpenSea to View and buy NFTs

On Mobile

Enter your Metamask wallet and click the menu top left and select "Browser"

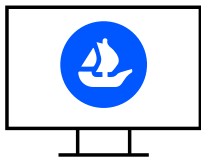

Enter <https://opensea.io/JustCollectingLTD> into the browser

This will open our OpenSea store page, it should be automatically connected to your wallet, you can click on your OpenSea profile and view your NFTs you can also choose an NFT from our store and purchase it. You will need to follow the prompts from Metamask to approve the transaction.

After doing this the NFT will be added to your wallet.

To View your NFT in OpenSea click the top left menu bars and select "Browser" then enter <https://opensea.io>, click on OpenSea.

Click the top right menu bar in OpenSea, then click "account" > "Profile" then click the "Collected tab" now you can view your NFTs

On Desktop

Enter <https://opensea.io/JustCollectingLTD> into the browser, this will open our OpenSea store page, it should be automatically connected to your wallet, to check this click on the wallet icon (top right of the OpenSea page) if not follow the prompts to connect.

You can click on your OpenSea profile and view your NFTs you can also choose an NFT from our store and purchase it.

You will need to follow the prompts from Metamask to approve the transaction. After doing this the NFT will be added to your wallet.

Viewing your NFT on Opensea

On Mobile

Click the 3 menu lines (top left)

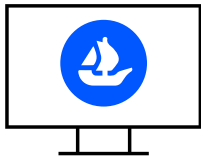

Click Browser

Enter www.opensea.io in the top browser bar

Click the 3 menu bars in opensea (top right)

Select "Account" then select "Profile"

You will now see your NFTs in OpenSea and can list for sale if you wish to.

On Desktop

Go to <https://opensea.io>

Connect your Metamask Wallet and you will be able to view your NFTs.

Viewing your wallet and transactions

You can view your wallet in its entirety and all associated transactions by visiting <https://etherscan.io> and entering your wallet number. (at the top you will be able to select the Polygon blockchain, (Ethereum blockchain is displayed by default))

Security Checklist

Write down secret phrase words and store them **securely**.
Never share them. If asked by anyone for this phrase never give it.

This phrase gives full access to your funds and enables you to access your wallet if you lose your device or set up a new device. If you lose these words, you will lose access to your wallet.

There is more information available on the Metamask wallet setup page.
